The screenshot displays the Windows Server Manager interface. On the left-hand side, there is a tree view under "Server Manager (HELDERJORGE-DC)". The "Print Services" folder is expanded, revealing several sub-items: "Print Management", "Custom Filters", "Print Servers", "HelderJorge-DC (local)", "Drivers", "Forms", "Ports", "Printers" (which is currently selected), and "Deployed Printers". Below these are other server roles like "Web Server (IIS)" and various features such as "Features", "Diagnostics", "Configuration", and "Storage".

The main pane on the right shows the "Printers" section. At the top, it lists three installed printers:

Printer Name	Queue Status	Jobs In Queue	Server Name
HP Color LaserJet 2800 Series PS	Error	1	HelderJorge-DC.
Microsoft XPS Document Writer	Ready	0	HelderJorge-DC.
Ricoh Aficio 120 PCL6	Ready	0	HelderJorge-DC.

Below this list, the printer "HP Color LaserJet 2800 Series PS" is selected. Two tabs are visible at the bottom of this section: "Jobs" and "Printer Web Page". The "Jobs" tab is active, displaying a table of print jobs:

Document Name	Job Status	Owner	Pages	Size
Ola - Notepad	Error - Printing	AntonioJorge	1	1,90 KB

On the far right, there is an "Actions" panel. It contains two expandable sections: "Printers" and "HP Color La...". Both sections show a "More ..." link followed by a right-pointing arrow.

At the very bottom of the screen, the Windows taskbar is visible, featuring the Start button, several open application icons, and the system clock which reads "PT 21:28".
